Amanda – I agree with dioxin/furans. However, the DDx and PAH RALs are complete and have been transmitted to the LWG. Please let us know if you are refusing to produce those maps.

Thanks,

Kristine Koch

Subject: RE: Updated Core Profile Maps

Hi Kristine –

Per our cover email of September 3, the LWG intends to generate core profile maps for the other COCs (e.g., DDx, PAHs, and dioxin/furans) once RAL issues for these COCs are resolved or EPA issues a draft of FS Section 3. Also, it is our understanding that EPA will present its approach for how dioxins/furans will be managed in the revised FS during the January 6th technical meeting. We suggest holding off developing additional core profile maps for D/Fs until after this meeting, and for the remaining COCs until the RALs are resolved. This avoids extensive rework of the maps for these other COCs should EPA make changes to the RALs.

Thanks,
Amanda

Amanda – based on your response, these are approved final as modified. Please proceed with development of the core profile maps for the other focused COCs.

Thanks,

Kristine Koch

Hi Kristine -

Good catch, we'll revise the maps to show cores within PCB RALs B and E instead of PCB RALs B and F. (Note that cores inside of PCB RAL B are by definition also inside of PCB RAL E.) We'll get these back to you next week.

Amanda

Subject: RE: Updated Core Profile Maps

Amanda – I have just one question. The core profile maps circled “cores within RALs B through F” and “cores with RALs F”. How does that link with Karl’s request that you circle the core profiles that are within the PCB RAL B and RAL E?

Thanks,

Kristine Koch

Subject: Updated Core Profile Maps

Kristine –

The core profiles have been modified based on an additional request from Karl Gustavson on 11/19. He requested that we “circle” the core profiles that are within PCB RAL B and RAL E. These maps are saved to the LWG server at the following link:

PHCP Files | Documents Under Review | 2014-12-03_Total PCB Core Profile Maps.pdf
